Picture Day

Guess what? It's time to practice those smiles... Picture Day is coming on December 6 in the Boys Building & December 7 in the Girls Building. Pre-order forms will be distributed next week א"ה. Be sure to look out for them!

found our Elementary School in the lunchroom for a grand Tzivos Hashem Rally. We were so lucky to have one of our students picked by Tzivos Hashem to say a פסוק. Perry Wolf did a fantastic job!

ל' מר-חשון

The רבי רש"ב established the first Lubavitch Yeshiva called חסידי חסידות.
In this ישיבה the bochorim had a set time to learn both חסידי and חסידי.
It is thanks to the that we have our school and we are זוכה to learn חסידי in our חדר.

The רבי רש"ב's name: ר' שלום קוב-ג'ס
The רבי רש"ב's wife: מרת שרה-מלכה
The רבי רש"ב's mother: מרת מרתה
The רבי רש"ב's father: ר' חנהל
The רבי רש"ב's only son: מרת פרידלוקס

The רבי רש"ב is known as the "חסידי of חסידי".
because he explained חסידי very clearly.

אנחנו גרים אצל הדינל אצל דני
פתחים לאנחנו אצל אצל

the same thing. We strive to be
"נרות שחיות" - lights that give light,
both in our own homes as well as in the outside world,
through spreading Chassidus and doing Shlichus.

OUR SCIENCE PROJECT

Today in Science we were asked a question; "magnets or gravity which is stronger?" Most of us thought it was gravity but we took a shoe box, a paperclip, rope, tape and magnets.

First we took the shoe box and we laid it down on the table the short way. Then we took the paper clip and the rope and we tied the paper clip with tape together. Next we took off a piece of tape and the rope and taped them to the shoe box. Then we took the magnets and taped them onto the top of the shoebox. Then we took the paper clip and put it right under the magnet. The first time it didn't work then we opened up some of the stuff on the box and it worked! It shows that magnets are stronger than gravity.

HOW TO MAKE A SCIENCE EXPERIMENT

This week on Tuesday we took a nail wire that was sort of a goldish color and a big battery. We took the wire and wrapped it over the nail. We put it between two hoops on the battery. Then it got really hot. We almost burnt our hands. We love science.

Grade 3 - Science Project

Seventh grade physics class built bridges out of 100 popsicle sticks and glue. Each team tried to make a bridge that would hold as much dirt as possible without collapsing. Two teams created bridges that held up almost 40 pounds of dirt. Congratulations to all for putting in their best efforts.

Preschool

פארברענגען's and crowns are the hallmark of birthday celebrations in our preschool and the birthday of the רבי רש"ב was no different. פרשת חיי שרה lends itself so well to preschool learning. חסד comes easily to young children and flourishes with encouragement. We used candles to create interesting art projects, felt the softness of "clouds" of cotton balls, and smelled the delicious aroma of challah baking that we enjoyed once baked. We were even able to carry the lessons over into our Pre 1A English class and did a little experiment to test what would happen to the bread we left out overnight, unlike אמינו's challah that stayed fresh all week, ours became hard as toast. Yes, we learned the letter "T" this week. In Nursery we learned the letter ג' and our קינדערלאך worked together to create a wall mural outside their classroom to illustrate ג' words. Thank you to all our Nursery and UPK moms who have responded to our invitation to participate in our Mystery Reader project. We look forward finding out next week who our first Mystery Reader will be!
